

# Detecting non-Gaussian entanglement using neural networks

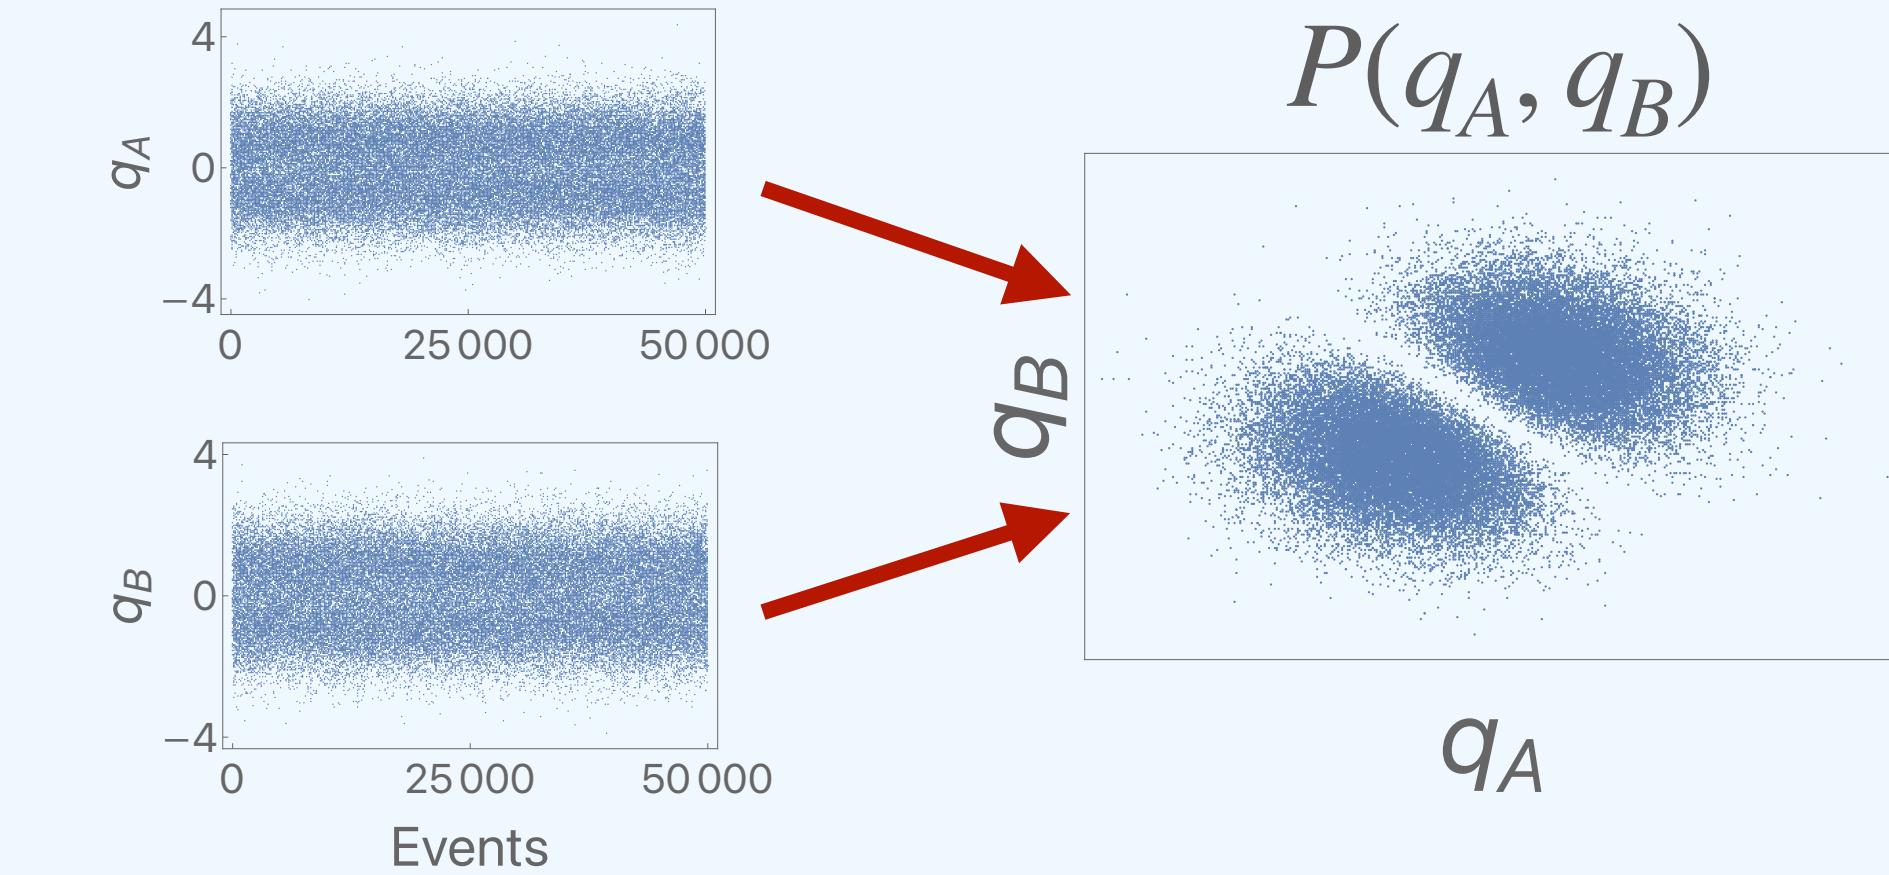

Laboratoire Kastler Brossel  
Physique quantique et applications

Xiaoting Gao, Mathieu Isoard, Fengxiao Sun, Carlos E. Lopetegui, Yu Xiang, Valentina Parigi, Qiongyi He, and Mattia Walschaers

## Problem

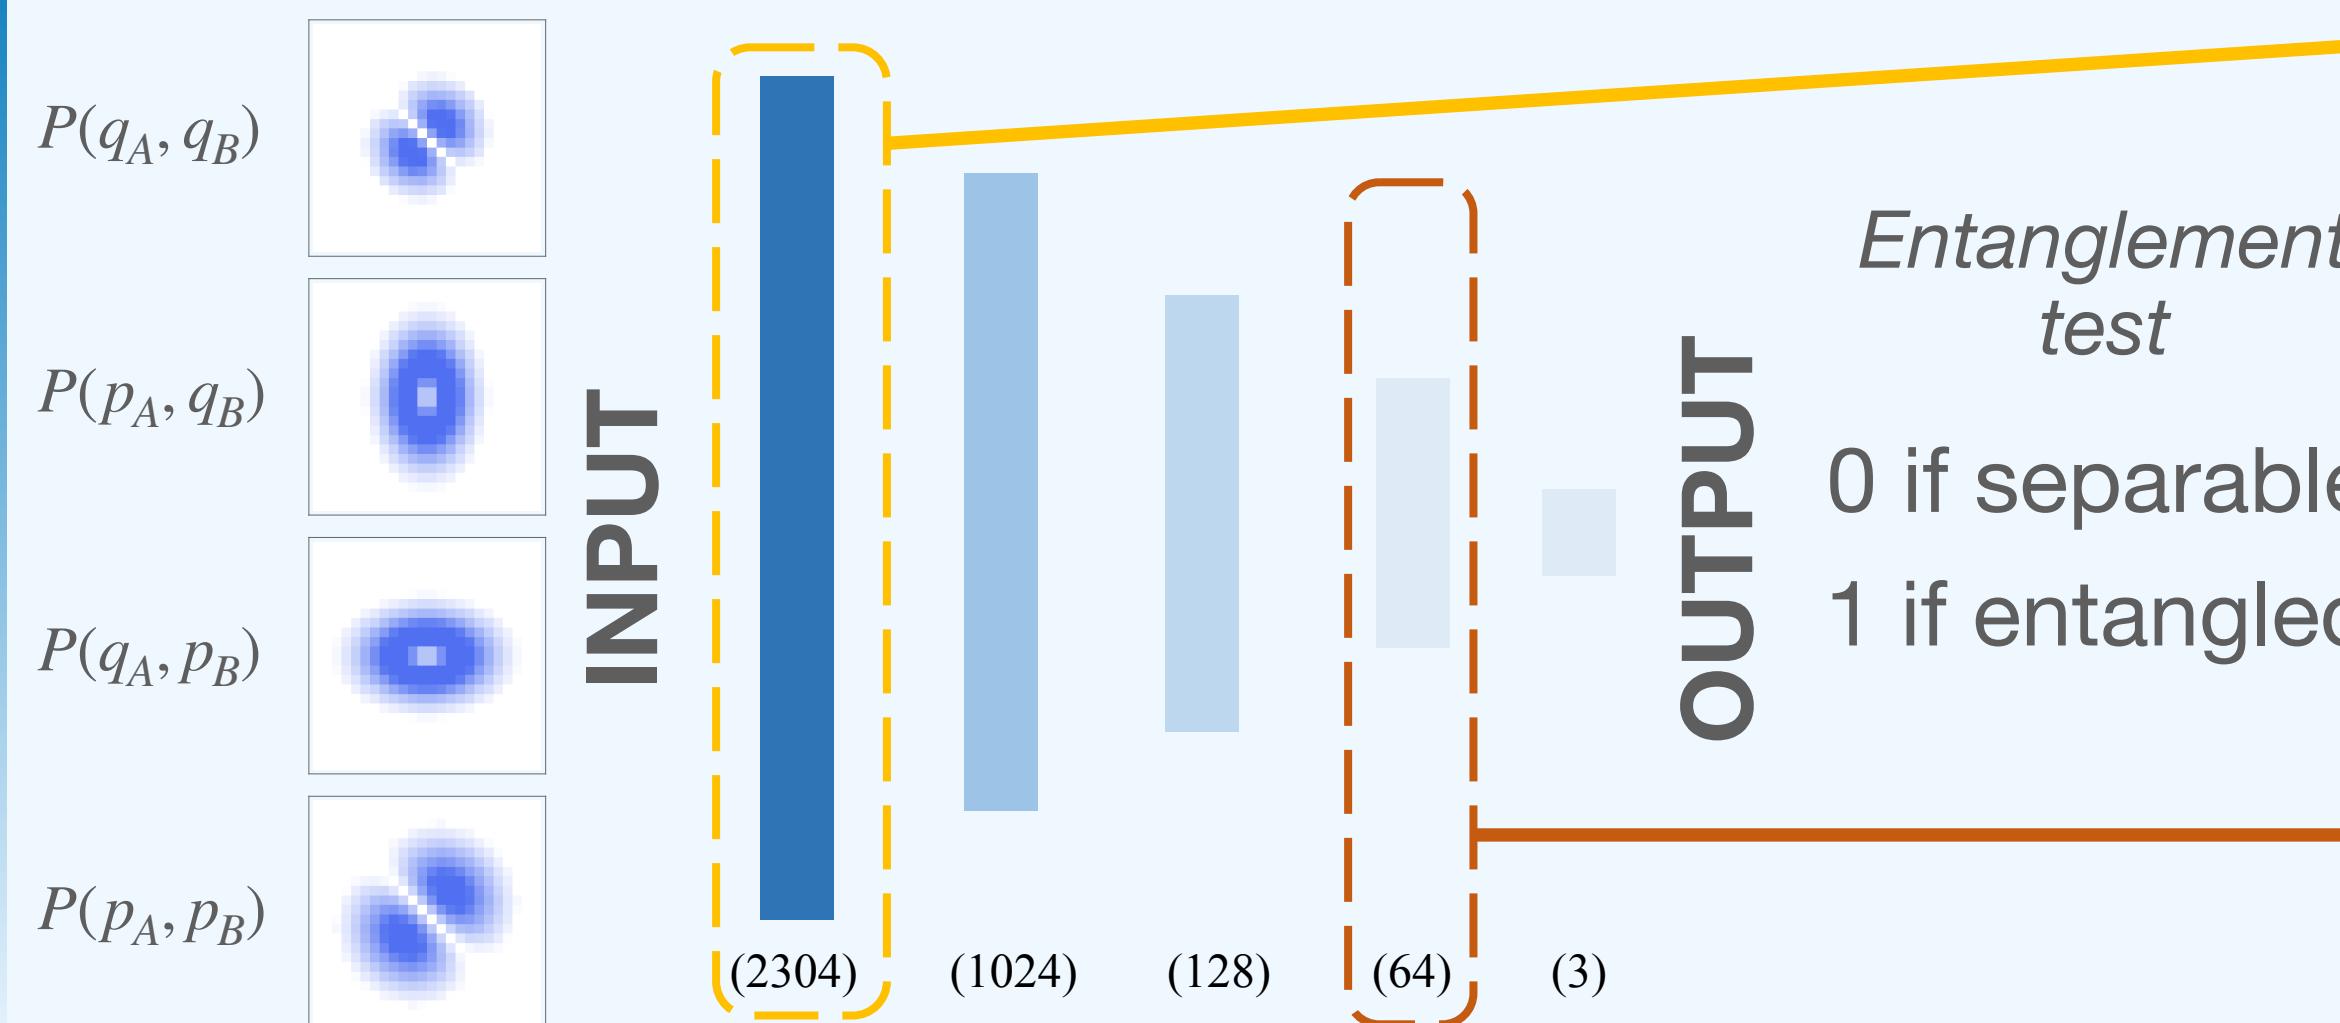

We can recover the statistics of  $\hat{q}$  and  $\hat{p}$

Reconstruct the density matrix → accumulate many data and use a *maximum likelihood algorithm*

## Neural network

## Results
